1892.

# REPORT.

TO THE RIGHT HON.

SIR GEORGE OTTO TREVELYAN, BART., M.P.,

*Her Majesty's Secretary for Scotland.*

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, *23rd December* 1892.

SIR,

I had the honour in 1891, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 90, to transmit to your predecessor in Office, as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1890, along with the usual explanation and commentary.

At the same time, my Twenty-sixth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1890).

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,

*Registrar-General.*

# REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

The general condition of the weather throughout Scotland during the year (1890), and which has a distinct bearing upon the wellbeing of a community, is as follows. The temperature was above the average of past years; the rainfall in the northern half of the country was also above the average, while over the southern half it was somewhat the reverse. The hours of sunshine were under the average of past years, and particularly so during the summer months. The winds which prevailed were from the east and west; while those from the northern and southern points of the compass were under the average.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1890, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

| YEARS | Estimated Population. | BIRTHS. | | Deaths. | Marriages. | Excess of Births over Deaths. | Percentage to Population. | | | Percent. of Illegit. to Total Births. |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Total. | Illegit. | | | | Births. | Deaths. | Marriages. | |
| 1855 | 2,978,065 | 93,349 | 7,357 | 62,004 | 19,680 | 31,345 | 3·1491 | 2·0820 | 0·6608 | 7·8 |
| 1856 | 2,995,771 | 101,821 | 8,695 | 58,529 | 20,740 | 43,292 | 3·3988 | 1·9537 | 0·6923 | 8·5 |
| 1857 | 3,012,310 | 103,415 | 8,869 | 61,906 | 21,369 | 41,509 | 3·4331 | 2·0551 | 0·7094 | 8·5 |
| 1858 | 3,027,665 | 104,018 | 9,354 | 63,539 | 19,655 | 40,479 | 3·4356 | 2·0986 | 0·6492 | 8·9 |
| 1859 | 3,041,812 | 106,543 | 9,715 | 61,714 | 21,201 | 44,829 | 3·5026 | 2·0288 | 0·6969 | 9·1 |
| 1860 | 3,054,738 | 105,629 | 9,736 | 68,170 | 21,225 | 37,359 | 3·5578 | 2·2316 | 0·6948 | 9·2 |
| 1861 | 3,069,404 | 107,009 | 9,929 | 62,341 | 20,896 | 44,668 | 3·4863 | 2·0310 | 0·6808 | 9·2 |

population, the lowest rate which has been given in these Reports since 1855, the year they were first issued.

The mean birth-rate for the last ten years, 1880 to 1889, is 3·27 per cent. or 327 per ten thousand population.

The male births for the present year number 62,187, the female 59,339, giving a preponderance to the former of 2848.

---

TABLE V*a*.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1890, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

| County Wigtown | 5,062 | 154 | 3·04 | 15·9 |

The births are in excess of the deaths during the year by 42,522.

The number of illegitimate births registered is 9241, equal to 7·60 per cent. of the total natal events, a lower proportion than for any previous year. The male illegitimates are 4715, the female 4526.

The births are registered as follows in the five Registration Districts:

TABLE VI.—Number of Births, Deaths, and Marriages in 1890, and their Proportion to the Population, estimated to the middle of the year, in Scotland, its Groups of Districts, its Divisions and Counties; also the Number of Illegitimate Births, and their Proportion to the Total Births.

| Insular-Rural | 1454 | 1360 | 2814 | 1380 | 1287 | 2667 | 74 | 73 | 147 | 28 | - |
| SCOTLAND . . | 62187 | 59339 | 121536 | 57472 | 54813 | 112285 | 4715 | 4526 | 9241 | 1421 | 13 |

last ten years being 3·18 per cent. The births in the Small Town Districts amount to 25,640—the males 13,127, the females 12,513, a rate of 3·07 per cent., the mean for the last ten years being 3·32 per cent. In the Mainland-Rural Districts the births are 26,978—the males 13,791, the females 13,187, giving a rate of 2·70 per cent., the mean for the last ten years being 2·92 per cent. In the Insular-Rural Districts they amount to a total of 2814—males 1454, females 1360, together giving a rate of 2·23 per cent., the mean for the last ten years being 2·46 per cent.

As to the illegitimate births alone, Tables VIII. and IX. indicate how they were registered in the above districts. In the Principal Town Districts they form 3746 of the total births which occurred therein, or 7·4 per cent. of the whole—the males numbering 1905, the females 1841. In the Large Town Districts they are 906 in all, equivalent to 5·9 per cent. of births in the same—males 455, females 451. In the Small Town Districts they amount to 1848, *i.e.*, 7·2 per cent. of the whole—males 972, females 876. In the Mainland-Rural Districts they are in all 2594, equal to 9·6 per cent. of the total births registered in the same—males 1309, females 1285. In the Insular-Rural Districts they are 147, or 5·2 per cent. of the total births—males 74, females 73. In other words, one child in every twelve born throughout Scotland during 1890 was illegitimate; in the Principal Town Districts the ratio was one in every thirteen and a half; in the Large Town Districts it was one in nearly every seventeen; in the Small Town Districts it was one in nearly every fourteen; in the Mainland-Rural Districts it was one in every ten; and in the Insular-Rural Districts one in every nineteen.

Information of a similar nature as to the Principal Towns is afforded in Tables V*a*. and V*b*. Thus in Aberdeen 10·6 per cent. of the births during 1890 were illegitimate; in Dundee the proportion was 10·2 per cent.; in Perth it was 8·7 per cent.; in Edinburgh it was 8·4 per cent.; in Glasgow it was 7·6 per cent.; in Leith it was 6·0 per cent.; in Paisley it was 5·5 per cent.; in Kilmarnock it was 4·8 per cent.; in Greenock it was 4·7 per cent.; in Glasgow Landward and Suburban, it was 4·3 per cent.

Table VI. enables a comparison being made as to the number and proportion of such births in the counties of Scotland, the latter varying from 2·97 per cent. in Shetland to 15·86 per cent. in Wigtown, Banff coming next with 14·86 per cent., followed by Kirkcudbright with

TABLE IX.—Proportion of Births in 1890. Percentage of Births to Population, and of Illegitimate to the Total Births; also the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; with the Proportion of Mothers who bare Twins and Triplets in Scotland, and its Five Groups of Districts in 1890.

| FIVE GROUPS OF DISTRICTS. | Per-centage of Births to Population. | Per-centage of Illegit. to Total Births. | Proportion of Males to every 100 Females in the | | | Proportion of MOTHERS who bare TWINS. — One in every | Proportion of MOTHERS who bare TRIPLETS. — One in every |
|---|---|---|---|---|---|---|---|
| | | | Total Births. | Legitimate Births. | Illegit. Births. | | |
| Principal Town | 3·223 | 7·4 | 104·7 | 104·8 | 103·5 | 87·3 | 7182 |
| Large Town | 3·296 | 5·9 | 105·0 | 105·3 | 100·9 | 90·2 | 15065 |
| Small Town | 3·071 | 7·2 | 104·9 | 104·5 | 111·0 | 78·6 | 12657 |
| Mainland-Rural | 2·650 | 9·6 | 104·6 | 104·9 | 101·9 | 79·7 | 8735 |
| Insular-Rural | 2·229 | 5·2 | 106·9 | 107·2 | 101·4 | 99·5 | – |
| SCOTLAND . . . | 3·025 | 7·60 | 104·8 | 104·8 | 104·2 | 84·2 | 9203 |

14·18 per cent., Dumfries with 13·46 per cent., and Kincardine with 13·1 per cent. In twenty counties the ratio is under 8 per cent., the lowest occurring in Orkney with 4·96 per cent., in Ross and Cromarty with 4·60 per cent., in Dumbarton with 4·50 per cent., and in Shetland with 2·97 per cent.

Of the total 121,526 live births reported throughout Scotland during the year, 62,187 are male and 59,339 female children, which gives a proportion of 104·8 of the former to every 100 of the latter. The corresponding ratios among the legitimate births alone is just the same, 104·8, and among the illegitimate alone it is 104·2 males to every 100 females. This proportion does not vary much in the districts, the greatest difference being in the Insular-Rural, where for every 100 females born there were 106·9 males.

During the year 1421 mothers bore twins, and 13 bore triplets, so that of the total mothers who bore children one in every 84 bore two, and one in every 9203 bore three at a birth.

The largest proportion of the births in Scotland was registered during the month of May:—viz., 9·00 per cent. of the whole, followed by April with 8·67 per cent., January with 8·63 per cent., December with 8·61 per cent., July with 8·57 per cent., March with 8·50 per cent., June with 8·49 per cent., October with 8·30 per cent., August with 8·18 per cent., September with 8·17 per cent., February with 7·66 per cent., and November with 7·21 per cent. When the months are equalized to a similar length of 31 days, 8·92 per cent. of the births were reported during April, 8·82 per cent. during May, 8·60 per cent. during June, 8·45 per cent. during January, 8·44 per cent. during December, 8·40 per cent. during July, 8·33 per cent. during March, 8·30 per cent. during February, 8·28 per cent. during September, 8·14 per cent. during October, 8·02 per cent. during August, and 7·30 per cent. during November.

The birth-rate for each ten thousand of population in the following European States is, for the year under review, 367 in Austria, 366 in Prussia, 359 in Italy, 357 in German Empire, 329 in the Netherlands, 306 in Denmark, 300 in Norway, 287 in Belgium, 266 in Switzerland, and 218 in France.

## MARRIAGES.

27,469 marriages in all were registered throughout Scotland during the year 1890, an increase over those for the previous year by 1125, and equal to a marriage-rate of 6·62 per ten thousand of the inhabitants, the highest since 1883. The mean average rate for the last ten years, 1880 to 1889, is 6·7 per ten thousand of population. The marriage-rate in England for the present year is 7·7·5 per ten thousand.

This rate varies in the different Registration Districts and counties in Scotland. Thus among the former the Principal Town Districts show the highest rate of 84·36 per ten thousand of the inhabitants of the same, the mean for the last ten years being 82; in the Large Town Districts the rate is 72·85 per ten thousand, the mean for the last ten years, 68; in the Small Town Districts the rate is 63·11 per ten thousand, the mean for the last ten years, 62; in the Mainland-Rural Districts the rate is 50·95 per ten thousand, the mean for the last ten years, 51; and in the Insular-Rural Districts the rate is 33·02 per ten thousand of the population of the same, the mean for the last ten years being 39. When compared with the proportion for last year, an increase is seen in each, with the exception of the Insular-Rural Districts, in which the rate is lower for the present than what it was for the previous year.

In the counties also the marriage-rate varies much—from 85 per ten thousand of estimated population in Lanark and 84 in Kinross, the highest, to 35, the lowest, in Argyll. In seven counties the rate is above that for Scotland—viz., in Lanark and Kinross as just mentioned, in Edinburgh and

---

| 1888 | 25305 | 0·6402 | 11647 | 5052 | 2876 | 2464 | 783 | 1724 | 0 | 759 |
| 1889 | 26344 | 0·6620 | 11846 | 5263 | 3004 | 2653 | 791 | 1943 | 3 | 841 |
| 1890 | 27469 | 0·6862 | 12408 | 5347 | 3097 | 2791 | 768 | 2025 | 0 | 1033 |

Linlithgow each with one of 76, in Ayr with one of 74, in Renfrew with one of 73, and in Forfar with one of 69 per ten thousand of population. The lowest rate occurs in Orkney and Inverness, each with one of about 41, in Sutherland with one of about 40, in Ross and Cromarty with one of about 39, and in Argyll with one of 35. In twenty counties the rate is higher for the present than for the past year; in thirteen it is lower.

Table V*a*. shows the marriage-rate in the Principal Towns to be in Glasgow 96·5 per ten thousand of the estimated population, in Edinburgh 83·0, in Dundee 78·4, in Aberdeen 79·1, in Leith 76·1, in Greenock 73·7, in Paisley 86·2, in Perth 78·8, in Kilmarnock 87·4, and in Glasgow Landward and Suburban, 67·9.

The fertility of the marriages for the year is estimated as usual. The number of marriages registered during 1884 amounted to 26,106, and the legitimate births recorded during the present year (1890) amount to 112,285, so that $\frac{112285}{26106}$ gives 4·30 as the average fertility of each marriage, or 430 children were born to every 100 marriages. In England the average number of children born to each marriage for the same period is 3·90, or 390 to each 100 marriages.

TABLE XII.—Proportion of Marriages, 1855–1890. Percentage of Marriages contracted in Scotland according to the Rites of the several Religious Denominations during each of the Years 1855–1890.

| 1883 | 46·09 | 20·39 | 12·10 | 10·15 | 2·71 | 6·32 | 0·04 | 2·20 |
| 1884 | 45·97 | 21·06 | 11·50 | 9·98 | 2·70 | 6·43 | 0·00 | 2·36 |
| 1885 | 46·21 | 21·12 | 11·52 | 9·65 | 2·77 | 6·49 | 0·00 | 2·24 |
| 1886 | 46·94 | 20·54 | 11·51 | 9·14 | 2·95 | 6·51 | 0·00 | 2·41 |
| 1887 | 46·99 | 19·56 | 11·77 | 9·74 | 2·75 | 6·65 | 0·01 | 2·53 |
| 1888 | 46·03 | 19·96 | 11·37 | 9·74 | 3·09 | 6·81 | 0·00 | 3·00 |
| 1889 | 44·97 | 19·98 | 11·40 | 10·07 | 3·00 | 7·38 | 0·01 | 3·19 |
| 1890 | 45·17 | 19·47 | 11·27 | 10·16 | 2·80 | 7·37 | 0·00 | 3·76 |

The marriages as solemnized by clergymen of the more prominent denominations throughout Scotland, during the year, are, by those of the Established Church 12,408, or 45·17 per cent. of the whole; by those of the Free Church 5347, or 19·47 per cent. of the whole; by those of the United Presbyterian Church 3097, or 11·27 per cent. of all; by those of the Roman Catholic Church 2791, or 10·16 per cent. of all; by those of the Episcopal Church 768, or 2·80 per cent. of all; by those of other denominations than the above, 2025, or 7·37 per cent. of the whole; while marriages of an irregular nature have increased to 1033, and form 3·76 per cent. of the total celebrations.

These ratios indicate an increase during the present year over those of 1889 in the case of the Established Church, of the Roman Catholic Church, and of marriages of an irregular nature, a decrease being evident in the case of the remainder.

On inquiry as to the relative proportions in which the marriage ceremony has been performed under the auspices of the various denominations since registration began in 1855, it is found that of the whole, 45·53 per cent. come under Established Church, 22·13 per cent. under the Free Church, 13·07 per cent. under the United Presbyterian Church, 9·32 per cent. under the Roman Catholic Church, 2·41 per cent. under the Episcopal Church, 6·18 per cent. under other denominations, 0·24 per cent. in which the denomination was not stated, and 1·12 per cent. were irregular in character. Table X*a*. gives the number of marriages celebrated according to the rites of the several religious denominations, and the proportion thereof in the Registration Counties and Principal Towns of Scotland. Marriages

solemnized under the auspices of the Established Church bulk most largely in the counties of Shetland, Banff, Kincardine, Fife, Clackmannan, Haddington, Dumfries, Kirkcudbright, and Wigtown, in each of which over 60 of every 100 couples married during the year were united by clergy of this Church, while in ten more the percentage is over 50; in two counties only is the rate under 20 per cent. Marriages by clergy of the Free Church show the largest proportion in Sutherland, and in Ross and Cromarty, in each of which over 60 per cent. may be so accounted for, and in two more the rate is between 50 and 60 per cent.; in nineteen counties the rate is under 20 per cent. The greatest proportion of marriages performed by ministers of the United Presbyterian Church occur in Orkney 32 per cent., Selkirk 27 per cent., and Berwick 22 per cent. A ratio of between 10 and 20 per cent. is found in Nairn, Perth, Fife, Kinross, Clackmannan, Stirling, Dumbarton, Bute, Renfrew, Lanark, Linlithgow, Edinburgh, Peebles, Roxburgh, and Dumfries; while in the remaining fifteen counties the rate is under 10 per cent. Marriages in accordance with the rites of the Roman Catholic Church occur in largest proportion in the counties of Forfar, Stirling, Dumbarton, Renfrew, Lanark, and Linlithgow, where in every 100 celebrations over 10 are so described; between 5 and 10 per cent. occur in Inverness, Clackmannan, Argyll, Ayr, Edinburgh, Haddington, Peebles and Selkirk; and in the remainder the ratio is under 5 per cent., or there were no marriages registered under this heading. Those celebrated in accordance with the rites of the Episcopal Church show the largest proportion in Kincardine, Forfar, and Edinburgh, in all of which the rate is over 5 per cent. There are no marriages of this nature in Orkney, Caithness, Sutherland, Nairn, Bute, Linlithgow and Haddington. Marriages as performed by clergymen of other denominations than those mentioned are most noticeable in Aberdeen, Forfar, Stirling, Renfrew, Lanark, Berwick and Selkirk. Irregular marriages were most marked in Aberdeen, Forfar, Perth, Renfrew, Lanark and Edinburgh.

In the towns the largest proportion of marriages performed by clergy of the Established Church occur in Perth 46 per cent., Aberdeen 52 per cent. and Leith 53 per cent., the smallest in Glasgow Landward and Suburban,

Dundee, and Greenock each with 35 per cent., and in Glasgow with 32 per cent. Marriages celebrated by ministers of the Free Church bulk most largely in Kilmarnock and Perth, each with 23 per cent., and Edinburgh 25 per cent., being least apparent in Paisley and Dundee, each with 17 per cent., Leith with 16 per cent., and Glasgow with 15 per cent. Marriages performed by ministers of the United Presbyterian Church have their highest proportions in Glasgow Landward and Suburban, and Paisley, each with 14 per cent., and Leith with 15 per cent., being lowest in Dundee 8 per cent., and Aberdeen 5 per cent. Marriages performed under the auspices of the Roman Catholic Church are most marked in Glasgow and Paisley, each with 15 per cent., and in Dundee and Greenock each with 16 per cent., least so in Edinburgh and Perth, each with 6 per cent., and Aberdeen 2 per cent. Marriages in accordance with the rites of the Episcopal Church are in greatest proportion in Perth and Dundee, each with 6 per cent., and in Edinburgh 7 per cent., least so in Glasgow 3 per cent., in Kilmarnock 2 per cent., and in Glasgow Landward and Suburban, 1 per cent. Marriages solemnized by ministers of other denominations than those mentioned are in greatest proportion in Glasgow Landward and Suburban, 11 per cent., and in Aberdeen and Dundee each with 12 per cent., least so in Edinburgh 6 per cent., and in Perth and Leith each with 4 per cent. Irregular marriages are most apparent in Dundee 6 per cent., in Edinburgh 8 per cent., and in Glasgow 10 per cent., least so in Kilmarnock 2 per cent., and Paisley 1 per cent.

Of the whole 54,938 persons married during the year, but 2 men and 3 women omitted to state their age upon the occasion. 1713 or 6·24 per cent. of the men committed themselves to matrimony ere attaining the age of 21 years, and of these one took to himself a wife before he was 17 years of age; while two of the brides became wives while still under 16 years of age.

From Table XIV. it is seen that of the men married during the year in Scotland 2·56 in every 100 had not attained a greater age than 20 years, the corresponding proportion among the females being 11·61; these ratios are exceeded in the case of both sexes in the Principal and Large Town Districts. At ages 20–25 years, 35·74 per cent. of the men and 45·33 per cent. of the women were married in Scotland, ratios exceeded

---

TABLE XV.—Marriages, 1855–1890. Number and Proportion of Men and Women in Scotland at each Quinquennial Period of Age who contracted Marriage during the Years 1855–1890.

| AGES. | MEN. | | WOMEN. | |

in the case of both sexes in the Large and Small Town Districts. Between 25–30 years, 32·87 per cent. of the husbands and 25·63 per cent. of the wives married in Scotland, a proportion exceeded in the case of both sexes in the Small Town Districts, Mainland-Rural, and Insular-Rural Districts. At ages between 30–35 years, 13·94 per cent. of the men and 8·94 per cent. of the women married throughout Scotland, exceeded in the case of both sexes in the Mainland and Insular-Rural Districts, as also slightly in the case of the men in the Principal Town Districts. But 6·49 per cent. of the men and 4·06 per cent. of the women were married at ages between 35–40 years, the greatest proportion of marriages at this age occurring in the Insular-Rural Districts and that in the case of both sexes. At ages after this the rate falls steadily and in each district.

The relations of the contracting parties to each other are as follow:—23,715 bachelors espoused spinsters, 747 bachelors married widows, 2178 widowers were united to spinsters, and 816 widowers re-entered matrimony with a like number of widows; or 86·33 per cent. of the marriages during the year were between bachelors and spinsters, 2·72 per cent. between bachelors and widows, 7·93 per cent. between widowers and spinsters, and 2·97 per cent. between widowers and widows.

Table XVIII. among other things affords some information as to the educational status of those marrying during the year, giving the proportion of husbands and wives who signed the Register upon that occasion, or who did this by "*mark*" only. Thus in Scotland 96·08 per cent. of the men and 93·58 per cent. of the women wrote their names, leaving 3·92 per cent. of the former and 6·42 per cent. of the latter who simply adhibited their "*mark*" in lieu of their name. In the Mainland-Rural Districts 98·02 per cent. of the men and 96·98 per cent. of the women signed their names; in the Small Town Districts 96·34 per cent. of the men and 93·98 per cent. of the women signed; in the Principal Town Districts the corresponding ratios were 95·79 per cent. and 92·84 per cent.; in the Large Town Districts they were 94·89 per cent. and 93·53 per cent. respectively; and in the Insular-Rural Districts 87·77 per cent. and 70·98 per cent., leaving the large ratio of 12·23 per cent. of the men and 29·02 per cent. of the women married in these latter parts who were apparently unable to write.

Among the counties the inhabitants of which fail most in this manner are Ross and Cromarty, where 14·52 per cent. of the husbands and 42·24 per cent. of the wives used "*mark*," Inverness where 9·25 per cent. of the

every person married during the year wrote his or her name, and in Orkney and Banff all the husbands did this and but a small proportion of their partners had recourse to their "*mark.*"

Marriage Registers by "Mark" during the Ten Years 1880–89.

As to the two cities Edinburgh and Glasgow, in Edinburgh 98·79 per cent. of the bridegrooms signed the Register and 97·72 per cent. of the brides did the same, leaving 1·21 per cent. of the former and 2·28 per cent. of the latter who adhibited their "*mark*," and in Glasgow 94·45 per cent. of the husbands and 90·86 per cent. of the wives signed, leaving 5·55 per cent. of the former and 9·04 per cent. of the latter who preferred to use their "*mark*."

On Table XVIII*a*. are given the percentages of those who signed the Register on the occasion of their marriage by means of "*mark*" only, and that for Scotland for the five Registration Districts, for the eight divisions into which the county is geographically divided, in each county and in the two cities Edinburgh and Glasgow, for each of the ten years 1880–1889, as also the mean of the same, which enables one to see at a glance how the standard of education, as judged of by this means at our disposal, is being raised in a more or less gratifying manner throughout these different divisions of the country.

14·62 per cent. of the whole marriages during the year were registered during the month of June, 13·18 per cent. during January, 11·86 per cent. during December, 11·19 per cent. during July, 8·39 per cent. during November, 7·54 per cent. during April, 6·68 per cent. during September, 6·20 per cent. during March, 5·96 per cent. during October, 5·75 per cent. during August, 4·99 per cent. during February, and 3·36 per cent. during May.

The proportion of marriages per ten thousand of the respective populations was in the following European States during 1890 as follows:—82 in Prussia, 80 in the German Empire, 75 in Austria, 73 in Italy, 72 in Belgium, 71 in the Netherlands, 70 in Switzerland and France, 69 in Denmark, and 64 in Norway.

## DEATHS.

During the year 79,004 deaths were registered throughout Scotland, being at the rate of 197 for every ten thousand of the population, or one death in every 51 of the inhabitants, the highest rate since 1883. The male deaths number 39,130, the female 39,874, the rate among the former being 203, and among the latter 193 per ten thousand of the respective number of each sex estimated to be alive at the middle of the year. The mean death-rate for the last ten years is 193 per ten thousand of the population.

The number of deaths and the mortality-rate in each of the five great Registration Districts are as follow:—In the Principal Town Districts the deaths number 35,262, which is at the rate of 223 in each ten thousand of estimated population (the mean for the last ten years being 222), the male deaths alone number 17,594, and the female 17,668; in the Large Town Districts the deaths are 9431, giving a rate of 204 per ten thousand of the population (the mean for the last ten years being 198), male deaths are 4654, female 4777; in the Small Town Districts the total mortality is 15,657, or 188 per ten thousand (the mean for the last ten years is exactly the same, 188), the male deaths numbering 7752, the female 7905; in the Mainland-Rural Districts the deaths are 16,678, or at a rate of 167 as above (the mean for the last ten years being 159), males being 8194, females 8484; and in the Insular-Rural Districts the total is 1976, or 156 per ten thousand

(the mean for the last ten years is 158), male deaths number 936, female 1040. The mortality-rate in the Urban Districts together is 210 per ten thousand of their inhabitants as estimated, that in the Rural Districts being 165.

Table XX. gives the death-rate of males and females in each district of Scotland, and indicates how the female rate in the Mainland-Rural Districts alone is above that of the male, and that the male and female death-rate in the Principal Town and Large Town Districts is above that for Scotland as a whole, the reverse holding good in the other three districts.

Tables XXI. and XXII. show the deaths and mortality-rate in each of the Principal Towns. Thus in Glasgow 13,374 deaths are registered, which is at the rate of 23·8 per thousand of the population; in Edinburgh the deaths are 5423, a rate of 20·9 per thousand; in Dundee they are 3688, equivalent to 23·8 per thousand; in Aberdeen they number 2603, or 21·6 per thousand; in Leith they are 1517, or 21·9 per thousand; in Greenock they are 1419, or 21·4 per thousand; in Paisley they are 1355, or at the rate of 20·7 per thousand; in Perth they are 681, or 22·2 per thousand; in Kilmarnock they are 619, or 22·3 per thousand; and in Glasgow Landward and Suburban, they number 4583, being a mortality-rate of 20·6 per thousand.

Table XIX.—Deaths of Males and Females in Scotland, and its Five Groups of Districts, during each of the Years 1855-1890.

Tables XXIII. and XXIV. give the number of persons dying throughout the country and in the five Registration Districts at a series of ages, with the proportions to those estimated to be alive at the like ages. Thus in Scotland the rate of mortality among male infants under one year of age is 14·789 per cent. of the sex presumed to be alive at this age during 1890, the corresponding rate among the females being 12·202 per cent., ratios exceeded in the case of both sexes in the Principal and Large Town Districts, the rate among the males in the former at like age being 17·474 per cent., and of the females 14·424 per cent., and in the Large Town Districts 16·492 per cent. and 13·655 per cent. respectively, being on the other hand in the Insular-Rural Districts but 6·394 per cent. and 5·678 per cent. In each district the female death-rate at this age is below that of the male.

Under two years of age, the mortality-rate has fallen very much, being in the case of the males alive at that age 6·225 per cent., and of the females 6·102 per cent., proportions alone exceeded in the case of both sexes in the Principal Town Districts, and of the females alone in the Large Town Districts. In these latter districts and the two Rural the female rate is above that for the male.

Under three years of age, the rate throughout Scotland for the male children is 2·398 per cent., and for the female 2·371 per cent., exceeded only in the Principal Town Districts; the female rate in the Large Town Districts and Insular-Rural Districts is above that of the male.

| 1890 | 2·026 | 1·925 | 2·343 | 2·136 | 2·061 | 2·021 | 1·926 | 1·828 | 1·661 | 1·670 | 1·589 | 1·544 |

Under four years of age the rate for Scotland is in the case of the males 1·515 per cent., and of the females 1·481 per cent. exceeded in both cases in the Principal Town Districts, and in these same and the Insular-Rural Districts the female death-rate at this age is higher than the male.

Under five years of age the rate of mortality throughout Scotland is in the case of the males 1·078 per cent., and of the females 1·097 per cent., proportions which are exceeded in the Principal Town Districts in the case of both sexes and of the male in the Large Town Districts, the female rate overtopping the male in the Principal Town Districts and in both the Rural.

The percentage of deaths in Scotland registered as occurring during the first five years of life is 5·362 in the case of the males, and 4·762 in that of the females, proportions which have fallen during the succeeding quinquennial period (5–10 years) to 0·594 per cent. in the case of the males and 0·603 per cent. in that of the females, exceeded in the case of both sexes in the Principal Town Districts, and of the females in the Large Town Districts. Between 10–15 years the death-rate is at its lowest, being for the males in Scotland 0·380 per cent., and for the females 0·439 per cent., exceeded in the case of both sexes in the Principal and Large Town

| Glasgow Landward and Suburban | – | 2·30 | 2·27 | 2·48 | 2·21 | 2·20 | 2·07 | 1·99 | 1·80 | 1·82 | 2·13 | 2·06 |

Districts, and in that of the females in the Small Town Districts; in each district except the Insular-Rural the female mortality-rate is higher than that of the male. After this the death-rate rises slowly but steadily, and between 15–20 years the female rate is in each case under that for the male. Between 20–30 years the rate for both sexes in the Principal and Large Town Districts is above the corresponding for Scotland, and in each district except the Insular-Rural Districts the female mortality-rate is above that of the male. After 40 years of age the percentage of male deaths is in all cases in excess of that of the female. On the lower line of this table the mortality-rate at all ages for males and females is given. Thus in Scotland, while the male rate is 203 deaths in every ten thousand of the estimated population, the female rate is 193; in the Principal Town Districts the male death-rate is 234 per ten thousand, the female 214; in the Large Town Districts the male rate is 206, and the female 202; in the Small Town Districts the male rate is 193, and the female 183; in the Mainland-Rural Districts the male rate is 166 and the female 167; and in the Insular-Rural Districts the male death-rate is 159 and the female 154 per ten thousand of those of each sex presumed to be alive at the middle of the year.

Table XXVII. affords similar information as to the Principal Towns; thus the highest infantile mortality (under one year of age) occurred in Dundee, where in every hundred children of that age 21·98 died during the year, followed by Leith with 16·94, Glasgow 16·49, Aberdeen 16·22, Kilmarnock 14·40, Edinburgh 14·38, Glasgow Landward and Suburban, 14·37, Greenock 13·98, Perth 12·54, and Paisley 11·39. During the second year of life the highest mortality was in Glasgow, 10·70 per cent., followed by Dundee 9·12 per cent., Greenock 8·65 per cent., Kilmarnock 8·41 per cent., Leith 7·89 per cent., Perth 7·80 per cent., Edinburgh 7·64

per cent., Glasgow Landward and Suburban, 7·35 per cent., Paisley 6·43 per cent., and Aberdeen 5·31 per cent. For the period of childhood (0–5 years) the largest ratio of deaths were registered in Dundee 7·90 per cent., followed by Glasgow 7·50 per cent., Leith 6·55 per cent., Kilmarnock 6·32 per cent., Edinburgh 5·98 per cent., Aberdeen 5·85 per cent., Greenock 5·84 per cent., Glasgow Landward and Suburban, 5·69 per cent., Perth 5·53 per cent., and Paisley 4·92 per cent.

Table XXV. gives the percentage of deaths at the same ages as in Table XXIV., but in this case calculated as to the total deaths in Scotland and each of the five Registration Districts. In Scotland, as a whole, 22·45 per cent. of the male deaths and 17·79 per cent. of the female occurred during the first year of life; in the Principal Town Districts the ratios were 24·34 per cent. and 19·44 per cent. respectively; in the Large Town Districts they are higher, viz., 25·14 per cent. and 20·22 per cent.; while in the Insular-Rural Districts they are but 10·36 per cent. and 7·69 per cent. At ages 0–5 years the rate in the Principal Town Districts is 43·70 per cent. of deaths among the males, and 37·53 per cent. among the females, and are the top mortality-rates at this age, the lowest occurring in the Insular-Rural Districts, 16·13 per cent. for the former sex, and 13·84 per cent. for the latter. As has been before noted, at ages over 60 years a larger proportion of the total deaths, and that in the case of both sexes, occurs in the Rural than in the Urban Districts, the reverse being the case at ages under 60 years.

The death-rate per ten thousand population during 1890 is in the undernoted European States as follows:—294 in Austria, 264 in Italy, 244 in the German Empire, 240 in Prussia, 228 in France, 209 in Switzerland, 206 in Belgium, 205 in the Netherlands, 190 in Denmark, and 178 in Norway.

## CAUSES OF DEATH.

79,004 deaths were registered throughout Scotland during 1890, of which the cause was properly specified in 78,254, leaving 750 not specified or ill-defined as to their proper nature.

The death-rate for the whole country per hundred thousand of the estimated population was in the case of both sexes 1974, that of the males alone being 2026, and of the females 1925. In the Principal and Large Town Districts the rate is in the case of both sexes conjointly, and of each sex separately, above the same for Scotland. In the Small Town and in both Rural Districts the death-rate is lower than that for the whole country. The highest rate occurs in the Principal Town Districts, viz., 2235 per hundred thousand of population; the lowest 1565, in the Insular-Rural Districts.

11,737 deaths from Zymotics were registered in Scotland during the year, which is 1994 more than during the previous year, and is in the proportion of 296 in every hundred thousand of the population, the male and female rate being also exactly the same as this, and constitutes 15·00 per cent. of the total specified deaths (Tables XXVIII. and XXIX.). This proportion is exceeded in the Principal and Large Town Districts; and in the Mainland and Insular-Rural Districts, the female rate is higher than that of the male.

Tables XXXII. and XXXIII. indicate the number and proportion of deaths from the chief Zymotics and other ordinary diseases at five different periods of life. Of the whole 11,737 deaths from Zymotics at all ages, 7917 occurred during the first five years of life, 964 between 5–10 years, 288 between 10–15 years, 1788 between 15–60 years, and 780 above 60 years of age; or 67·5 per cent. of the whole were between 0–5 years, 8·2

first five years of life, 150 or 5 per cent. dying during the following quinquennial period (5–10 years), and 3 deaths from the same occurred at ages 10–15 years. Measles caused the next highest mortality from this class of diseases, 2509 in all succumbing; of these 2283 or 91·0 per cent. died during the first five years of life, 183 or 7·3 per cent. during the following five years, and 1 death from the same is accounted for at an age between 75 and 80 years. Diarrhœa and Dysenteric conditions caused 1585 exits, 1078 or 68·0 per cent. of these during 0–5 years of life, 201 or 12·7 per cent. between 15-60 years, and 279 or 17·6 per cent. at ages over 60 years. To Diphtheria 1018 deaths are ascribed, 653 or 64·2 per cent. between 0-5 years, 259 or 25·4 per cent. between 5–10 years, the remainder at ages above 10 years. Scarlet-Fever caused 739 deaths, 454 or 61·4 per cent. during the first five years of life, 201 or 27·2 per cent. between 5–10 years, 47 between 10–15 years, and 37 between this and 60 years. Fevers caused 887 deaths. Of these 777 are due to Typhoid or Enteric, 67 or 8·6 per cent. of them during the first five years of life, 97 or 12·5 per cent. between 5–10 years, 112 or 14·4 per cent. between 10–15 years, 479 or 61·7 per cent. between 15–60 years, and 22 or 2·8 per cent. at ages over 60. Typhus caused 77 deaths, 57 or 74·0 per cent. of these occurring between 15–60 years. Simple or Ill-Defined Fever caused 30 deaths and Cerebro-Spinal Fever 3. Simple Cholera caused 57 deaths, 44 or 77·2 per cent. of them occurring during the years of childhood. Syphilis caused 196 deaths, of which 171 or 87·3 per cent. occurred during ages 0–5 years, 22 or 11·2 per cent. between 15–60 years. Erysipelas caused 340 deaths, 102 of which, or 30·0 per cent., are registered as during the first five years of life, 121 or 35·6 per cent. between 15–60, and 111 or 32·6 per cent. at ages over 60. Croup caused 744 deaths, 643 or 86·4 per cent. of them occurring between 0–5 years, and 92 or 12·4 per cent. between 5–10 years.

Out of every hundred thousand of the inhabitants of Scotland, 296 are

estimated to have died from Zymotic Disease during the year, which is equal to 15·00 per cent. of the specified causes of death. In the Principal Town Districts the rate is 370 per hundred thousand, or 16·57 per cent.; in the Large Town Districts it is 300 per hundred thousand of population, or 14·68 per cent. of all the deaths; in the Small Town Districts the rate is 274 per hundred thousand, or 14·61 per cent. of the deaths; in the Mainland-Rural Districts it is 213 to population, or 12·81 per cent. of the total deaths; and in the Insular-Rural Districts the rate is 146 per hundred thousand, or 9·35 per cent. of the specified deaths are of this nature.

Tables XXX. and XXXI. exhibit the same points in the case of the Principal Towns as XXVIII. and XXIX. do for Scotland and its districts. In Glasgow the deaths from Zymotics in each hundred thousand of its estimated population is 398, equal to 16·72 per cent. of the total specified deaths. Hooping-Cough accounts for 127 in like ratio to population, Measles for 115, Diarrhœa and Dysentery for 47, Diphtheria for 24, as also Fevers (21 of those being Typhoid), and Scarlet-Fever for 23.

In Edinburgh the proportion of Zymotics in every hundred thousand of the population is 351, and constituting 16·78 per cent. of the total mortality; Hooping-Cough accounts for 97 in like ratio, Measles for 93, Diarrhœal Affections for 37, Diphtheria for 33, Fevers for 20 (19 of these Typhoid), and Scarlet-Fever for 19.

In Dundee the proportion of Zymotic deaths is the same as in Edinburgh, 351 per hundred thousand of population, and forms 14·73 per cent. of all the deaths; Measles accounts for 106 of the above, Hooping-Cough for 89, Diarrhœa and Dysentery for 69, Diphtheria for 33, Fevers for 15 (13 being Typhoid), and Scarlet-Fever for 6.

In Aberdeen 366 is the proportional mortality from these diseases, equal to 16·94 per cent. of all the deaths. Hooping-Cough causes 121 of this proportion, Diarrhœa and Dysentery 48, Measles 45, Fevers 24 (21 being Typhoid), Scarlet-Fever 15, and Diphtheria 10.

In Leith the proportion of such deaths is 419 per hundred thousand

Hooping-Cough for 69, Diarrhœa and Dysentery for 40, Diphtheria for 34, Scarlet-Fever for 18, and Fevers for 15 (2 of these being Typhus and 13 Typhoid).

In Paisley the mortality from Zymotics is at the rate of 235 per hundred thousand of population, and equal to 11·38 per cent. of the whole. Scarlet-Fever accounts for 50 of the above, Diarrhœal Affection for 46, Hooping-Cough for 44, Diphtheria for 38, Fevers for 31 (9 of these Typhus and 21 Typhoid), and Measles for 6.

In Perth the rate for this class is 370, as estimated to the inhabitants, forming 16·69 per cent. of the total mortality. Hooping-Cough accounts for 138 of this, Measles for 72, Diarrhœa and Dysentery for 59, Diphtheria for 36, Scarlet-Fever and Fevers each for 16 (the whole of the latter being Typhoid).

In Kilmarnock 535 in every hundred thousand of the inhabitants succumbed to Zymotics during the year, forming 24·03 per cent. of the

total mortality; 166 of this proportion is due to Hooping-Cough, 137 to Measles, 65 to Diarrhœal Affections, 47 to Scarlet-Fever, 40 to Fever (33 being Typhoid), and 33 to Diphtheria.

In Glasgow Landward and Suburban, 353 deaths in every hundred thousand of the population were ascribed to Zymotics during the year, being 17·16 per cent. of the total mortality; 105 of these are due to Hooping-Cough, 99 to Measles, 35 to Diarrhœa and Dysentery, 33 to Diphtheria, 28 to Fevers (3 Typhus and 25 Typhoid), and 19 to Scarlet-Fever.

Not a single death from Small Pox has been recorded in Scotland during 1890.

Hooping-Cough is the Zymotic which caused the largest number of deaths during the year, viz., 3039, being in the proportion of 77 in every hundred thousand of the inhabitants, and constituting 3·88 per cent. of the total specified deaths. The male exits are 1372, the female 1667. The greatest ratio of deaths from this disease occurred in the Principal and Large Town Districts, in both of which it exceeds that for Scotland; the

rate is but 9 in the Insular-Rural Districts. Measles caused 2509 deaths, at the rate of 63 in each hundred thousand of the population, and forming 3·21 per cent. of the total mortality—males 1337, females 1172, most marked in the Principal Town Districts, where the rate is above that for the whole country, the Insular-Rural Districts again showing the lowest rate, viz., 19 in like proportion. Diarrhœa and Dysentery caused 1585 deaths, or 40 per hundred thousand of population, and equivalent to a rate of 2·03 per cent. of all—males 791, females 794. This rate is exceeded in the three Urban Districts, being highest in the Large Town Districts, 48, and but 12 in the Insular-Rural Districts.

Diphtheria is the ascribed cause of 1018 exits, which is 26 per hundred thousand of population, and 1·30 per cent. of the total deaths—males 475, females 543. The rate for the country is exceeded in this case in the Principal Town Districts and Mainland-Rural Districts, that in the other three being below.

Fevers cause 887 deaths, or 22 per hundred thousand of population, and equal to 1·13 per cent. of the total deaths—males 469, females 418. The rate in each of the Urban Districts is higher than that for Scotland. From Typhus Fever there are 77 deaths during the year—males 44, females 33, and from Typhoid 777 deaths—410 males and 367 females, equal to 20 per hundred thousand of population. Table XXXVII. shows that in the Rural Districts 8·33 per cent. of the Fever deaths were due to Typhus, and 88·69 per cent. to Typhoid, in the Town Districts the corresponding ratios were 8·76 per cent. and 87·34 per cent.

Scarlet-Fever caused 739 deaths during the year, at the rate of 19 per hundred thousand of population, or 0·94 per cent. of the total—males 377,

females 362. The highest proportion of deaths of this nature occurred in the Principal and Small Town Districts.

The wave of Influenza which had commenced its rise during the previous year, 1889 (when there were in all 62 deaths from it), became greatly intensified as a cause of mortality at the commencement of 1890, and 830 deaths were registered as occurring directly from it in Scotland during the year—436 males and 394 females. In addition, there were 73 deaths—40 males and 33 females, in which, although not the immediate, it was mentioned as one cause, and we have included those in our numbers in Table XXXII*a*, giving a grand total of 903 deaths—476 males and 427 females. In this Table the distribution of these is given as they occurred during each month of the year in Scotland in the five Registration Districts and in each county. During the month of November 1889 there were 8 deaths from this disease in all Scotland, and in December there were 15—the two highest numbers for any month of that year—while during January 1890 they had increased to 143—males 70, females 73. Of these, 58 occurred in the Principal Town Districts—24 males and 34 females; 17 occurred in the Large Town Districts—6 males and 11 females; 23 occurred in the Small Town Districts—14 males and 9 females; 44 occurred in the Mainland-Rural Districts—28 males and 16 females; and the death of 1 male was registered in the Insular-Rural Districts during the same month. In February 262 deaths from Influenza were registered—144 being males and 118 females. Of this number 47 occurred in the Principal Town Districts—22 males and 25 females; 18 occurred in the Large Town Districts—11 males and 7 females; 72 occurred in the Small Town Districts—48 males and 24 females; 112 occurred in the Mainland-Rural Districts—58 males and 54 females; and 13 occurred in the Insular-Rural Districts—5 males and 8 females. During March 235 deaths from the same disease are reported—130 males and 105 females. Of these, 34 occurred in the Principal Town Districts—16 males and 18 females; 21 occurred in the Large Town Districts—12 males and 9 females; 49 occurred in the Small Town Districts—30 males and 19 females; 107 occurred in the Mainland-Rural Districts—59 males and 48 females; and 24 occurred in the Insular-Rural Districts—13 males and 11 females. During April 111 deaths are registered—52 males and 59 females. Of these, 10 occur in the Principal Town Districts—4 males and 6 females; 8 occur in the Large Town Districts—2 males and 6 females; 30 occur in the Small Town Districts—14 males and 16 females; 44 occur in the Mainland-Rural Districts—23 males and 21 females; and 19 occur in the Insular-Rural Districts—9 males and 10 females. During May such deaths have declined to 55—males 22, females 33, in June they are a total of 22, in July of 19, in August of 9, in September of 12, in October of 14, in November of 13, and in December of 8. The total deaths during the year from Influenza in the five districts are 174 in the Principal Town Districts—80 males and 94 females; 78 in the Large Town Districts—36 males and 42 females; 201 in the Small Town Districts—121 males and 80 females; 374 in the Mainland-Rural Districts—199 males and 175 females; and 76 in the Insular-Rural Districts—40 males and 36 females. In the counties 19 deaths from Influenza occurred in Shetland, 20 in Orkney, 55 in Caithness, 30 in Sutherland, 55 in Ross and Cromarty, 52 in Inverness, 1 in Nairn, 22 in Elgin, 30 in Banff, 131 in Aberdeen, 10 in Kincardine, 60 in Forfar, 30 in Perth, 25 in Fife, 0 in Kinross, 4 in Clackmannan, 19 in Stirling, 16 in Dumbarton, 39 in Argyll, 5 in Bute, 14 in Renfrew, 40 in Ayr, 78 in Lanark, 11 in Linlithgow, 49 in Edinburgh, 6

in Haddington, 6 in Berwick, 7 in Peebles, 9 in Selkirk, 17 in Roxburgh, 20 in Dumfries, 15 in Kirkcudbright, and 8 in Wigtown.

Cancer is the ascribed cause of 2428 deaths, in the proportion of 61 in every hundred thousand of the population, or 3·10 per cent. of the specified deaths—the males numbering 899, the females 1529. The highest proportion of these occurred in the Principal, Small Town and Mainland-Rural

in Aberdeen, 60 in Paisley, 56 in Glasgow, 54 in Glasgow, Landward and Suburban, and 47 in Greenock.

From diseases of a Tubercular nature there are 10,294 deaths, equivalent to 260 in every hundred thousand of population, or 13·15 per cent. of all—males numbering 5114, females 5180. The corresponding ratios in the five districts are:—in the Principal Town Districts 313 to population, or 14·00 per cent. of the total deaths; in the Large Town Districts they are 271 or 13·29 per cent.; in the Small Town Districts 247 or 13·15 per cent.; in the Mainland-Rural Districts 189 or 11·35 per cent.; and in the Insular-Rural Districts 194 or 12·39 per cent. Phthisis accounts for 7660 of these deaths—males 3648, females 4012, and forms a mortality-rate of 193 in every hundred thousand of population, or 9·79 per cent. of the total deaths. The highest rate from this disease to population is 228 in the Principal Town Districts, next 197 in the Large Town Districts, 183 in the Small Town

| 1866 | 200 | 1884 | 14 |
| 1867 | 100 | 1885 | 39 |
| 1868 | 15 | 1886 | 24 |
| 1869 | 64 | 1887 | 17 |
| 1870 | 114 | 1888 | 3 |
| 1871 | 1,442 | 1889 | 8 |
| 1872 | 2,448 | 1890 | 0 |

Districts, 171 in the Insular-Rural Districts, and 148 in the Mainland-Rural Districts. In every hundred deaths from Phthisis among the males 10·5 died under 15 years of age, 70·1 between 15 and 45, and 19·4 at ages over this, the corresponding ratios among the females being 14·4 under 15 years, 71·5 between 15 and 45, and 14·1 at ages over 45 years. On comparing the death-rate from Phthisis with the total death-rate of each Principal Town it is found that for every hundred thousand of the inhabitants of Greenock as estimated, 271 died from Phthisis during the year, in Dundee the rate is 252, in Glasgow 251, in Paisley 228, in Perth 216, in Glasgow Landward and Suburban, 214, in Leith 210, in Aberdeen 202, in Edinburgh 190, and in Kilmarnock 173. Tabes Mesenterica caused throughout Scotland 838 deaths—males 454, females 384; Tubercular Meningitis 1140—males 637, females 503; and Scrofula 656—males 375, females 281.

To diseases of the Brain and Nervous System 9125 deaths are ascribed, males 4487, females 4638, which is equal to a rate of 230 in every hundred thousand of the population, and forming 11·66 per cent. of the total mortality, proportions exceeded in the Principal and Large Town Districts, the lowest rate being found in the Insular-Rural Districts, viz., 132. Among the towns the highest death-rate from this class of diseases was in Paisley, 298 per hundred thousand of the inhabitants, followed by Aberdeen 283, Glasgow Landward and Suburban 264, Greenock 261, Glasgow 252, Dundee 246, Edinburgh 242, Perth 236, Leith 195, Kilmarnock 170. Apoplexy was the cause of 2619 deaths in the persons of 1192 males and 1427 females; 1866 were due to Paralysis—males 852, females 1014; and 1200 to Convulsions—males 637, females 563.

Diseases of the Heart and Circulatory Organs caused 6151 deaths—males 2933, females 3218, equal to 155 per hundred thousand of the population of Scotland, and 7·86 per cent. of the total deaths. In the three Urban Districts the rate is higher than for the county, the reverse holding good in the Rural Districts. Among the towns the death-rate from these affections is highest in Perth, 243 per hundred thousand of the inhabitants, followed by Kilmarnock 202, Edinburgh 178, Dundee 173, Leith 169, Aberdeen 159, Glasgow 148, Paisley 147, Greenock 145, and Glasgow Landward and Suburban, 143. Disease of the Heart caused 5625 deaths—males 2646, females 2979.

From diseases of the Respiratory Organs, exclusive of Phthisis, there are 16,032 deaths—males 8241, females 7791, forming a mortality-rate of 404 per hundred thousand of population, and 20·49 per cent. of the total deaths. These proportions are exceeded in the Principal Town Districts, where they are 496 and 22·21 per cent. respectively, and in the Large Town Districts 428, and 20·97 per cent.; in the Small Town Districts the rate to population is 359 and percentage 19·13; in the Mainland-Rural Districts 305 and 18·30 per cent., and in the Insular-Rural Districts 250 to population and 15·98 per cent. of the deaths. Bronchitis caused 8057 deaths—males 3820, females 4237. Pneumonia caused 4923 deaths—males 2781, females 2142; and Croup 744—males 373, females 371. Among the Principal Towns, Dundee comes first with the highest ratio of deaths to population from such diseases, viz., 579 per hundred thousand or 24·28 per cent. of all the deaths, followed by Glasgow with 572 or 24·01 per cent. as the corresponding

ratios, Kilmarnock with 488 or 21·92 per cent.; Aberdeen and Greenock each with 453 to population, the former 20·97 per cent. and the latter 21·11 per cent. to total deaths; Leith with 450 or 20·50 per cent., Perth with 446 or 20·09 per cent.; Paisley with 437 or 21·14 per cent.; Glasgow Landward and Suburban 431 or 20·98 per cent.; and Edinburgh 405 or 19·36 per cent.

Diseases of the Digestive System caused 5401 deaths—males 2645, females 2756, and forming a rate of 136 per hundred thousand of population or 6·90 per cent. of all deaths. In the districts the highest rate from such occurs in the three Urban, the lowest in the two Rural. Among the Principal Towns, Leith indicates the highest rate, viz., 166 to population, followed by Dundee 163, Glasgow 161, Aberdeen 149, Paisley 144, Kilmarnock 137, Edinburgh and Greenock each with 136, Perth 131, and Glasgow Landward and Suburban 119. Enteritis caused 1101 deaths, Peritonitis 732, Hernia 137, Liver Diseases 924, Ileus, Stricture of Intestine, and Intussusception together 380.

From diseases of the Urinary Organs there are 1981 exits—males 1180, females 801, forming a death-rate of 50 per hundred thousand of the population, and 2·53 per cent. of the total mortality. Acute Nephritis caused 376 deaths, Bright's Disease 759, Calculus 33, other diseases of the Bladder and Prostate 344, and in 299 cases the special form of disease is not stated.

Diseases of the Reproductive Organs cause 584 deaths—males 18,

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1881–1890; specifying those from Typhus and Enteric Fever.

| MONTHS. | Total Fever Deaths. | Typhus. | Enteric. | MONTHS. | Total Fever Deaths. | Typhus. | Enteric. |
|---|---|---|---|---|---|---|---|
| January | 336 | 71 | 255 | July | 229 | 46 | 169 |
| February | 292 | 80 | 196 | August | 276 | 55 | 213 |
| March | 278 | 81 | 184 | September | 376 | 58 | 307 |
| April | 283 | 79 | 192 | October | 351 | 38 | 308 |
| May | 252 | 68 | 173 | November | 326 | 58 | 257 |
| June | 240 | 56 | 174 | December | 368 | 61 | 289 |

females 566, Ovarian Disease caused 61 deaths, Uterine Affections and Diseases of Menstruation 106, and diseases incidental to Parturition other than Puerperal Fever, to which 324 are due, cause 363, together giving a total of 687.

From diseases affecting the Organs of Locomotion (the Bones and Joints), there are 482 deaths—males 269, females 213, and from diseases of the Skin 207—males 101, females 106.

From diseases connected with Development (excluding Old Age) there are 2239 deaths—males 1247, females 992, of which Premature Birth accounts for 1830, Atelectasis for 109, Cyanosis, Spina Bifida, and other Congenital Defects for 300—males 172, females 128.

To Old Age 4629 deaths are ascribed—males 1741, females 2888, and giving a mortality-rate of 117 in every hundred thousand of the population. 36 of the men and 83 of the women died at ages between 95 and 100, and 8 of the former and 12 of the latter are registered as being over 100 years at death. Of the men who died at these most advanced ages, two are 100 years of age, and one at each of the following, 101, 102, 103, 104, 106 and 108 years, while of the women one was 100 years, five were 101 years, two 102 years, two 103 years, and two 105 years of age at death.

From Violence 2859 persons met their end—males 2114, females 745, in the proportion of 72 per hundred thousand of population, the male rate 111, the female 36, and forming 3·65 per cent. of the total deaths. On the present occasion the nomenclature of such causes of death is somewhat altered from what it was formerly, to be more in accordance with that as used by the Registrar-General of England in his Reports. Deaths caused by Accident or Negligence amount to 2630—males 1952, females 678, while to those caused by other forms of Violence than the above 229 deaths are due in the persons of 162 males and 67 females, 22 of them being Homicidal, 206 Suicidal, and one male was judicially executed during the year. Of the Accidents, 122 deaths occurred in connexion with mines and quarries, while 336 individuals met their death accidentally on railways, or in connexion with other kinds of vehicles, and horses. From Burning and Scalding 305 persons died, and to Drowning 665 deaths are ascribed—64 of these latter being Suicidal—males 37, females 27. From Poisoning 80 deaths in all occur—60 of these being Accidental and 20 Suicidal, the latter

TABLE XXXIX.—The Twenty-two most fatal Causes of Death in Scotland in 1890, arranged in the order of their fatality.

| DISEASES. | Proportion of Deaths to 100,000 living. | DISEASES. | Proportion of Deaths to 100,000 living. |
|---|---|---|---|
| Bronchitis | 203 | Developmental Diseases of Children | 56 |

| Cancer | 61 | Tabes Mesenterica | 21 |
| Atrophy and Debility | 61 | Enteric Fever | 20 |

in the persons of 13 males and 7 females. The poisons which accidentally caused death were Opium in one form or other in the case of 19 males and 10 females, Chloroform 3 males and 2 females, Belladonna 1 male, Strychnia 1 male, Chloral Hydrate 1 male, Carbolic Acid 1 male and 1 female, Sulphuric Acid 1 female, Hydrochloric Acid 1 male, Oxalic Acid 1 male and 1 female, Brass Polish Liquid 1 female, Alcohol 1 male, Methylated Spirit 1 female, Lead 2 males, Mercury 1 male and 1 female, Caustic Soda 1 male, Savin 1 female, Laburnum Pods 1 female, Coal Gas 2 males, Foul Gas in a drain 1 male, and in a Biscuit-Tank 1 male, while in the case of 1 male and 2 females the special form is not stated. Of the poisons taken by suicides, Opium was used by 7 males and 2 females, Chlorodyne by 1 male, Chloroform by 1 male, Hydrocyanic Acid by 1 male, Carbolic Acid by 1 female, Cyanide of Potassium by 2 males, Oxalic Acid and Salt of Sorrel each by 1 female, Arsenic by 1 male, Phosphorus by 1 female, another female having used an "irritant poison," name not given.

59 Males and 23 females committed suicide in the Principal Town Districts, 11 males and 6 females in the Large Town Districts, 39 males and 11 females in the Small Town Districts, 40 males and 15 females in the Mainland-Rural Districts, and 2 females in the Insular-Rural Districts.

---

## WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1890 are extracted from the Notes of the Astronomer-Royal, appended to the monthly Reports issued by the Registrar-General.

*January* was remarkable for extraordinarily high mean temperature, associated with a low barometer, a large preponderance of westerly winds, and very heavy rainfall at the three western towns.

*February*, in contrast to the preceding month, was remarkable for extremely high barometric pressure, very light rainfall, restricted to a few days of falling, and a decided preponderance of light easterly winds.

---

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1890, compared with the Mean of the Ten Years 1871–1880.

| | Year 1890. | | | 1871–1880. | |
|---|---|---|---|---|---|
| Months. | Mean Temperature. | Actual Deaths. | Proportion to 12,000 per Annum, or 1000 per Month. | Monthly Proportion of Deaths. | Mean Temperature. |
| | ° | | | | ° |
| January . . . . | 41·0 | 7977 | 1212 | 1154 | 37·5 |
| February . . . . | 37·8 | 7596 | 1154 | 1061 | 38·6 |
| March . . . . . | 41·6 | 7743 | 1177 | 1138 | 40·2 |
| April . . . . . | 43·6 | 6966 | 1059 | 1064 | 44·2 |
| May . . . . . | 51·0 | 6650 | 1010 | 1040 | 48·4 |
| June . . . . . | 53·9 | 5991 | 910 | 939 | 54·7 |
| July . . . . . | 54·7 | 5854 | 890 | 921 | 57·8 |
| August . . . . . | 55·2 | 5222 | 793 | 893 | 57·3 |
| September . . . . | 56·4 | 5592 | 850 | 834 | 52·6 |
| October . . . . . | 48·4 | 5943 | 903 | 885 | 46·5 |
| November . . . . | 41·0 | 5992 | 910 | 949 | 40·2 |
| December . . . . | 35·2 | 7452 | 1132 | 1122 | 37·0 |
| Year . . . . | 46·7 | 78,978 | 12,000 | 12,000 | 46·2 |

*March* was characterised by decidedly low barometric pressure, with usual range of the same exceptionally high and variable temperature; winds normal as to distribution, but somewhat light on the whole, in spite of occasional gales.

*April* was a dry, calm month, normal as to temperature and barometric pressure, although the temperature varied more than usually, while the pressure was subject to but moderate changes. East and North-east winds were strongly predominant, associated with an average number of showery days, but with only a very small rainfall.

During *May* barometric pressure was somewhat low, but decidedly limited as to range. The mean temperature, although 1°·9 above the average, was 0°·8 below that of the phenomenally warm weather of the same month last year. Rain was slightly in excess of the average for the season both as to the quantity and number of days of falling. One half of the total winds blew from the Eastern quarter of the compass.

In *June* the barometric pressure, although but slightly below the mean, was somewhat more than usually disturbed. The mean temperature was appreciably below the average, but the range decidedly small. Rainfall above an inch in excess of the average of past years, and spread over more than the usual number of days in the proportion of 3 to 2. Damp, West winds prevailed for nearly half the times on which the direction of the wind was recorded.

In *July* the mean barometric pressure was somewhat low for the month, and more than usually limited in range.

---

TABLE XLI.—Meteorology of Scotland for 1890, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also, the Number of Births, Deaths, and Marriages registered during each Month of the Year 1890, as stated in the Quarterly Reports.

*August* was characterised by low barometric pressure, accompanied by large barometric range, low mean temperature, rainfall somewhat less than usual, though spread over a greater number of days, and wind lighter as to force but nearly normal in direction.

*September* was remarkable for the very high and steady barometric pressure, accompanied generally by winds, lighter than usual, and a mean temperature far above the average for the season, while rain was normal in mean quantity, though very irregular in distribution.

*October* was a relatively warm and rather dry month, with high barometric pressure, limited in range. Indeed the barometric range for this month has not been so small since 1880, when it was 1·183 inch.

*November* was, above all, a wet month, with a rather large range of temperature, and a slight preponderance of light South-east winds. The barometric pressure, although but 0·086 inch below the average, was marked by several sudden depressions, notably on the 4th, 7th to 11th, and again on the 23rd.

*December* was a relatively dry cold month, with a very marked prevalence of light winds from the East. The barometric pressure was unusually high, and the temperature exceptionally low; while the range in both factors was very restricted.

In Table XL. will be found in a succinct form the main features regarding the mean temperature and mortality experienced throughout Scotland during each month of 1890, and for comparison's sake the corresponding for a decennial period (1871–1880). The Table shows how the mean temperature of the months of February, April, June, July, August, and December are somewhat under that of the same months during the ten years, it being above the same in the case of the others. When the rates of monthly deaths are noted, it is found that 10·10 per cent. of the whole

are registered during January, 9·80 per cent. during March, 9·62 per cent. during February, 9·44 per cent. during December, 8·82 per cent. during April, 8·42 per cent. during May, 7·59 per cent. during June, as also November, 7·52 per cent. during October, 7·41 per cent. during July, 7·08 per cent. during September, and 6·61 per cent. during August.

Table XLII. enables one to trace in a general way how far each of the more ordinary causes of death contributed to the mortality among the inhabitants of the Principal Towns, during each month of the year.

From Small Pox there is no death during the year.

Measles and its sequelæ caused their heaviest mortality during the months of April, May and June, although in every month ending with July the deaths were much more numerous than during the latter five months of the year.

Hooping-Cough, which causes a larger number of deaths than any other Zymotic, follows much the same lines, the colder January and February apparently giving the disease a decided impetus; the minimum number occur during the latter three months of the year.

Scarlet-Fever attains its maximum during the earliest and latest months of the year, as also is the case with Diphtheria, the smallest number of deaths from those being registered during April, July, and August. Fevers, under which Typhus and Typhoid are chiefly included, attain their maximum during the autumnal and early winter months.

Diarrhœal Affections, as usual, indicate their greatest mortality during the later summer and the autumnal months of August, September, and October, rapidly falling thereafter, and chiefly telling upon the younger portion of the inhabitants of the Large Towns.

Phthisis or Consumption takes a heavy toll out of the population and that for every month of the year, the largest number of deaths from this

fall disease being registered during the month of March 381, January 302, April 292, February 286, and May 280.

Diseases of the Respiratory Organs, as Bronchitis and Pneumonia, were especially fatal during the early and later months of the year, those most markedly so being November with 544 deaths, April with 522, March with 501, February with 742, December with 747, and January with 274. Very much the same occurs in the case of diseases of the Heart and Blood-Vessels, January and December showing the largest mortality therefrom, viz., 226 in the former and 220 in the latter. It is so also with diseases of the Brain and Nervous System, deaths from this cause being most numerous during the colder and more inclement months of the year.

---

TABLE XLIV.—Monthly Mortality at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1891, and Proportion at each Age in every Hundred Deaths per Month.

From Old Age as a cause of death, 106 succumbed during February in these towns, 112 during December, and 118 during January.

Tables XLIV. and XLV. illustrate the main facts brought out as to the comparative mortality at each of four periods of life experienced during each successive month of 1890. In accordance with the latter Table, in which the months are equalised, children under 5 years of age died in largest proportion during the months of February and April, the mortality being at its lowest during August, which was by no means a warm month as compared with those of previous years, and such as is apt to induce Diarrhœal affections among the very young.

Among adolescents (5 to 20 years) deaths occurred in largest proportion during April, January and February, those months in which the weather was changeable both as regards rainfall and temperature, when, in fact, deaths from diseases of the Respiratory Organs may be presumed to be numerous. The lowest mortality was during August and September.

Among adults (20 to 60 years) the maximum mortality occurred during the two first months of the year, January and February, the minimum during August.

Among the aged (60 years and over) December shows the greatest mortality, followed by February and January, months as before stated in which climatic variations were marked, and before which those at advanced ages were obliged to succumb. The lowest mortality among the old occurred during the warmer months of August, July, and September.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.
EDINBURGH, 13*th December* 1892.

# APPENDIX TABLES.

# VACCINATIONS IN SCOTLAND—1890.

| No. of Division, &c. | REGISTRATION GROUPS, DIVISIONS, AND COUNTIES. | Successfully Vaccinated. | Vaccination Postponed. | Insusceptible of Vaccine Disease: On the ground of Constitutional Insusceptibility. | Insusceptible of Vaccine Disease: In respect of the Children having already had Small-pox. | Insusceptible of Vaccine Disease: On the ground of previous Successful Vaccination. | Died before Vaccination. | Removed from District before Vaccination, or otherwise unaccounted for. | Total Births for 1890. |

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing T
of 2000 Inhabitants and upwards are printed in small capitals, thus:—Carluke.
*N.B.*—An asterisk "*" is prefixed to those Districts which comprise one or more Parishes or parts of Parishes, and the
ponent parts of these Districts will be found at page 454.
A dagger "†" is prefixed to those Districts which consist of only a part of a Parish of the same name,
